-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 30 is indefinite for reciting "...movement of the spool..." without proper antecedent basis. Perhaps –valve—should be inserted for "spool". Claim 1 also recites "...a valve disposed between the output of pressurized fuel of the primary fuel pump and the secondary fuel pump...". This phrase seems to indicate that the valve is located between the pumps, yet Figure 1 shows a different arrangement. The location of the valve is unclear.

Claim 18 refers to "the spool" without proper antecedent basis.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3747

Claims 1- 3, 8, 18, 30-33, 41 and 45 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoover ('391). Hoover discloses a valve in a fuel system having the claimed elements, including a valve housing (30) having an inlet (32) and an outlet (48) and having an orifice (52) for controlling and retarding the opening of the valve. Note the spring biasing the valve in the closed position and its attachment location. The spool is element (50) which is cylindrical.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the various valves having dampers and/or retarding mechanisms.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas N Moulis whose telephone number is 703 308-2618. The examiner can normally be reached on M-Th.
